# Pullman: two new hotels in Toulouse

Pullman steps up its development in the south of France with the renovation of the Pullman Toulouse Centre and the Pullman Toulouse Airport.

### **Pullman Toulouse Centre**

After seven months of renovation work, the hotel, located just minutes from the train station, joins streamlined décor to high-end services. The hotel's 125 rooms and suites are an invitation to relaxation as well as to work in a carefully adapted space.

The elegant, friendly restaurant, "SW Café", offers regional products accented with notes from other cuisines. The water bar, one of the restaurant's attractions, features a selection of water – sparkling, with distinctive tastes and well balanced – from around the world: Japan, Argentina, Norway, England, etc.

The hotel also invites guests to take advantage of the bar in the "SW Lounge" for a moment of relaxation and escape, surrounded by its impressive library collection.

Business customers benefit from an area dedicated to professional meetings, with a 560-square-metre modular space suitable for every type of event.

The area includes 8 meeting rooms, a 9-square-metre reception room and a "Chill-Out" space, a private room designed like a living room, the perfect spot to take a break.

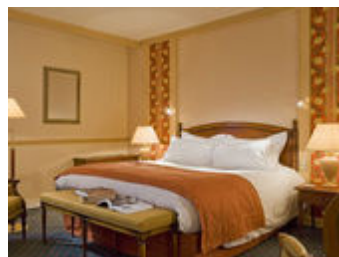

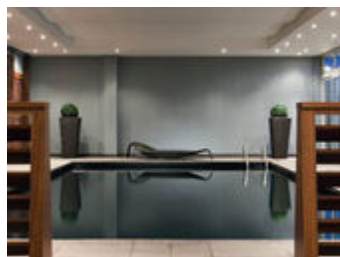

### **Pullman Toulouse Airport**

Located just 5 minutes from the Toulouse-Blagnac International Airport and 15 minutes from the city centre, the recently refurbished hotel is a warm, one-of-a-kind world with the works of local artists exhibited through the building.

"Le Corridor", encompassing a restaurant and a lounge area, features two distinct atmospheres – one for dining and one for relaxation.

A large indoor swimming pool and a fitness centre with a sauna are available for guests. Tall bay windows along the side of the pool and the fitness centre provide a lovely view of the terrace outside.
